TABLE OF CONTENT

PITCH DECK PRESENTATION

01 Market Focus

02 Business Strategy

03 Corporate Strategy

MARKET FOCUS

SCANDINAVIAN COUNTRIES

SWEDEN

- Sustainability leadership & eco-culture
- Government-backed green initiatives
- Established market for advanced polymers

FINLAND

- Circular economy infrastructure
- Strong R&D and innovation ecosystem
- Demand for compostable & recycled materials

DANMARK

- Government subsidies & green incentives
- High consumer eco-awareness
- Rising competition in green materials

A photograph of two men in a meeting. One man, wearing a black leather jacket, is holding a pen and writing in a notebook. The other man, wearing a white jacket, is looking at the notebook. They are sitting at a table with some papers and a coffee cup. The background is blurred.

BUSINESS STRATEGY

ALIGNING WITH NEW REGULATIONS

Transition to a:

Circular Economy Business Model

Objectives:

- Development and production of bio- and mineral-based compounds
- Creation of a take-back and recycling offer for end-of-life compounds

Opportunities & Advantages

- Strong market growth and premium positioning
- Cost benefits from incentives and public procurement
- Rising eco-demand and circular economy integration

AUDIT → INSTALLATION → LABEL → EXPANSION → OPTIMIZATION

ACTION PLAN

- **Stage 1 (Audit)**

Audit of current materials

Identification of local sources of recycled materials

Development of the first circular formulations

- **Stage 3 (Label)**

Certification of new products

- **Stage 5 (Optimization)**

Optimization of recycling processes

1st Year

2nd Year

3rd Year

4th Year

5th year

- **Stage 2 (Installation)**

Installation of recycling units

Creation of partnerships with local collectors

- **Stage 4 (Expansion)**

Expanding the collection network

Developing new sustainable solutions

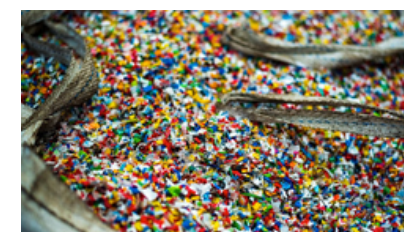

CORPORATE STRATEGY

SOLUTIONS OF THE PROBLEMS

1 Collaborative R&D to Foster Strategic Partnerships

2 Stimulate New Product Development

1

Collaborative R&D to Foster Strategic Partnerships

Leveraging Expertise and Infrastructure for partnership

Having the capability and capacity to invest, leveraging the bio compound expertise can help understand Scandinavian plastic better

Carlsberg Group - Denmark

Sustainable Packaging – Films, Wraps, Labels, multipack carriers to align with zero-waste initiatives

Paulig (Finland)

Compostable coffee capsules, packaging films materials and compounds

Essity (Sweden)

high-volume packaging and product components (e.g., wrappers for sanitary items).
Potential to incorporate **recycled plastics** or **compostable films** in product packaging and disposal systems.

Orkla (Norway)

Testing **recycled-content packaging** across multiple product lines (shampoos, detergents, frozen foods, etc.).

2

Stimulate New Product Development

High temperature Resistant compostible grades

PLA/PBAT-based compounds enhanced heat deflection coffee capsules hot food

Customized Compostable Injection molding Compounds

Develop a high impact biobased compound for durable and reusable compounds

High Compostable and Marine based Compounds

Home Compost Certification EN13432

Barrier Films for Food Packaging

Develop a new bio based compostable film for Low Plastic Brands

High Performance Recycled Engineering Plastics

Recycled PA (polyamide) or ABS compounds with mineral fillers, for technical parts (appliances, tools, etc.)

THANK YOU

● FOR YOUR NICE ATTENTION
